

AIR TRAFFIC MANAGEMENT

Boeing is partnering with companies and governments around the world to design

the global air traffic system of the future. Our goal is to dramatically improve the safety, security and capacity of the current system to support continued economic growth and global prosperity. We're fully committed to working on this long-term project, bringing all the technical expertise and resources Boeing has to offer to meet this requirement.

BOEING CAPITAL

Boeing Capital Corporation provides a broad range of innovative financing and

leasing solutions for airplanes, satellites and launch vehicles, and commercial equipment. By focusing on flexible, individually structured financial arrangements that meet the needs of its customers' businesses, Boeing Capital provides its clients with the resources they need to compete – and win – in the global marketplace.

X-50 Canard Rotor/Wing

BOEING PHANTOM WORKS

The advanced research and development unit of The Boeing Company is dedicated

to pursuing breakthrough improvements in the affordability, quality and performance of aerospace systems. Technologies and processes developed by Phantom Works teams are leading to advanced products like the X-45 Unmanned Combat Air Vehicle and the Sonic Cruiser. Phantom Works initiatives have also created dramatic cost and time savings on such programs as the F/A-18 E/F, the C-17 and Delta launch vehicles, just to name a few.

CONNEXION BY BOEING

It's no surprise the world's foremost aerospace company is leading the

way in airborne broadband communications. Our unique expertise in large-scale integration, satellite systems, commercial airplane manufacturing and high-speed data transfer methodology allows airlines to offer their customers a full array of broadband services in the air.

AND CROSS NEW FRONTIERS EVERY DAY.
