Boeing X-45 Precision Weapon Drop, 4/18/04.

The Boeing X-45 brings the vision of J-UCAS ever closer to reality. In test after test, the Boeing X-45 Joint Unmanned Combat Air System demonstrates the critical potential and value of autonomous technology in transforming military operations. With its man-in-the-loop mission control, this weapon system will provide warfighters with operational synergy and true force amplification, while reducing human risk. A powerful advantage on any battlefield.

In April, the Boeing X-45 Joint Unmanned Combat Air System marked an important strategic milestone by becoming the first unmanned aircraft to drop a precision-guided bomb on target. This new ad, for Boeing Integrated Defense Systems, highlights significant achievements in the development of this transformational program for the U.S. Air Force and the U.S. Navy. The ad will appear in key defense and industry trade publications.
